StayinFront Wellness Check is an easy-to-use feature, that has been designed to enable reps to answer key questions about their health before they are able to start their day.

Integrated with TouchCG, the responses from the Wellness Check are logged by the system, and can later be retrieved and analyzed by managers and administrative users.
Why Do You Need StayinFront’s Wellness Check?

StayinFront Wellness Check helps to safeguard not only the field reps, but also others that they may encounter helping to limit the spread of COVID-19.

How Does StayinFront Wellness Check Work?

➢ Once the field rep signs into TouchCG, they are presented with a pop-up of the Wellness Check solution
➢ Reps must complete the questions presented, or they will be prevented from being able to plan their day through TouchCG
➢ Once all questions are completed, the solution reminds them of the best safety practices to follow, and reps can then continue to plan their day
➢ The text of all the questions can be easily customized by client administrations via EdgeCG without any releases required
➢ Reporting is available to the client administrators via Edge, KPIs and Analytics once the devices are synced to the back office
